

A GLOBAL COMPANY  
MANUFACTURING LOCALLY

# PENTAIR® FACILITIES ACROSS THE USA

Look for the USA icon on Pentair® products that were designed and made in the USA.

We at Pentair Residential Filtration are committed to ensuring that over 80% of our products for the American market continue to qualify for the “qualified USA origin” statement. Over recent years, there have been competitors in the global marketplace manufacturing “knock off” imitation products and selling them under their own name. How can you be sure that the product you are purchasing is a quality Pentair product? Look for the Pentair qualified “Made in the USA” logo (such as the one below), on the literature and packaging of products that have been manufactured at our many plants in the United States.

The USA is unusual among the community of nations in breaking up domestic “country of origin” statements into two groups: claims of 100% domestic content (most commonly used for agricultural goods and raw minerals), and manufactured goods that are truly made in the USA, but perhaps incorporating some imported components as well as domestic ones.

We proudly support American manufacturing with our hard-working employees in places like Milwaukee, WI; Cleveland, OH; and Dover, NH, as well as our local suppliers who provide us the majority of our components used to manufacture our valves and tanks right here in the USA. Pentair assembles all valves, tanks, and accessories in USA factories.

**MADE IN THE  
USA**  
OF FOREIGN & DOMESTIC PARTS

## GLENDALE, WI (MILWAUKEE AREA)

Our Glendale facility is the global headquarters for Pentair Residential Filtration. In addition to being our center for technology development with a laboratory of 7,800 sq. ft., the Glendale facility also focuses on manufacturing carbon block extrusion and our newest product addition — the Hybrid DI™.

## BROOKFIELD, WI (MILWAUKEE AREA)

Pentair Brookfield is our largest production facility, employing over 300 dedicated Filtration & Process workers. Our Brookfield location is also the manufacturing headquarters for the Aquamatic®, Autotrol® and Fleck® valves.

## CHARDON, OH (CLEVELAND AREA)

With over 150,000 square feet spread over three buildings, our Chardon location is the Pentair center of excellence for our tanks and pressure vessels. Our Chardon location is the lead manufacturer of polyglass pressure vessels, hydropneumatic pressure tanks, and brine & storage tanks.

## DOVER, NH

Our Dover location leads the way for the Pentair industrial filtration lines including Fibredyne™ branded fiber wound carbon filters and melt blown filters.

## WINAMAC, IN

As an ASME and National Board Code Certified facility, our Winamac location is the lead manufacturer for Pentair of carbon and stainless steel filtration housings with optional U and UM certifications. With onsite engineering, Winamac fabricates a variety of standard configurations as well as custom housings.

# THE VALUE OF AMERICAN MANUFACTURING

## PRIDE

The Pentair® US headquarters is in Golden Valley, MN and is a Fortune 500 company listed on the New York Stock exchange (PNR). We have embraced the “in country, for country” model – designing, manufacturing and servicing products in the geographies where they are sold. Over 80% of the products, including tanks and valves sold in the United States, are produced in the United States – employing qualified and dedicated Americans in every step of the process. We are proud to support the American worker. Pentair currently has more than 10,000 employees working in the United States, actively supporting their local communities and economies. Pentair contributes 2% of annual profits toward the Pentair Foundation which supports education and safe water initiatives in our local communities.

## LEGACY

Founded in Minneapolis in 1963, Pentair has become a global leader in the water industry. From residential and commercial to municipal and industrial applications, Pentair has been a driving force in the development of new products and technologies. Across the US and around the globe, Pentair’s employees take pride in their work, and their knowledge and expertise have set the standard for the industry.

## QUALITY

At Pentair quality is our top priority as is our commitment to our customers. Employing lean manufacturing and strict quality controls, Pentair is proud to manufacture high quality products. We are continually investing in state-of-the-art manufacturing and a rigid testing procedure so our channel partners and consumers can feel confident that their purchases will last. Ongoing and increased investment in process improvement and new technologies will ensure that Pentair will remain a leader in providing durable and innovative products.

## CERTIFICATION

In order to consistently provide best-in-class products, Pentair has made a significant investment in testing and certification. All manufacturing facilities contain laboratories and highly trained technicians. The lab in Glendale, Wisconsin is a 7,800 square foot space designated as a “mirror lab” to the Water Quality Association (WQA) and National Sanitation Foundation (NSF) laboratories. Working in tandem with the industry’s governing bodies allows Pentair to ensure the highest quality and industry standards.

## SUPPORT

A product is only as good as the company standing behind it. Whether it is sales or service, customers can be certain that Pentair will be there. With a Wisconsin based team dedicated solely to customer satisfaction, and a global network of partners, consumers are never far from qualified professional support.
